**Toro Unveils New Autonomous Turf Pro™ and Range Pro™ Products at 2025 GCSAA Conference and Trade Show**

*Innovative Solutions Set to Revolutionize Golf Course Maintenance with Labor and Cost Savings*

**BLOOMINGTON, Minn.** (February 5, 2025) — Toro is excited to introduce two new products at the 2025 GCSAA Conference and Trade Show — the Turf Pro™ 500/300 and Range Pro™ 100. These innovative products are designed to optimize golf course maintenance by providing high-quality performance, consistent results, and significant labor and cost savings.

**Turf Pro 500/300: Cutting-Edge Technology for Effortless Mowing**

The Turf Pro is a state-of-the-art autonomous robotic mower that can mow up to 18.5 acres with precision and efficiency. Designed with cutting performance at its core, the Turf Pro leverages advanced technology to achieve consistently clean, well-maintained turf with minimal input from operators. Its quiet operation ensures little disruption to golfers, while its repeatable results provide superintendents with reliable performance.

The Turf Pro is ideal for freeing up labor to focus on other areas of the course, where specialized skills are needed. The mower's proficient capabilities ensure that every inch of turf is cared for without sacrificing quality.

**Range Pro 100: Streamlining Ball Collection on the Driving Range**

The Range Pro is an autonomous golf ball picking robot designed to streamline the labor-intensive task of collecting golf balls from the driving range. Capable of collecting up to 19,500 balls in 24 hours, the Range Pro is a game-changer for golf courses looking to save time and labor while maintaining a clean, tidy range for golfers. Its efficient design minimizes the need for manual labor, enabling course staff to focus on other critical tasks throughout the day.

Both the Turf Pro and Range Pro feature wireless monitoring and control capabilities, allowing superintendents to easily track and adjust their performance via computer or mobile device. These products are optimized to work seamlessly in conjunction with other Toro solutions, making them a perfect addition to any golf course operation.

“By introducing Turf Pro and Range Pro, Toro is continuing its commitment to providing golf course superintendents and crews with tools that enhance both efficiency and performance,” said Noah Wahl, product manager at Toro. “With Turf Pro, superintendents can focus on the areas of the course that require specialized attention, while Range Pro helps alleviate labor demands on the driving range. Both products deliver top performance while allowing for

significant labor and cost savings, without compromising the standard of quality that courses expect.”

### **See the Products in Action at the 2025 GCSAA Conference and Trade Show**

Golf course superintendents and maintenance crews can experience firsthand the benefits of these advanced autonomous systems at a new outdoor demonstration area during the show. Product experts will be on hand to answer questions and provide live demonstrations of both the Turf Pro and Range Pro.
